Subject: Optional compressor fill cap – dipstick assembly.

Unit/Part Affected: CP48301 booster compressor

Cubex has developed an optional fill cap – dipstick assembly for the CP48301 booster compressor. The modifications to the crankcase housing to accept the assembly will be made by Cubex on new compressors and during the rebuilding of existing compressors.

The new assembly for convenience will include a new flexible hose routed crankcase vent and fill cap. This will allow the filling of crankcase lubrication from any selected position as long as the slope is maintained to the compressor sump.

An oil level dipstick stick is also integrated into the retrofit adaptor block.

1. CP48001-0706 Breather Assy.

3. CM48001-720 Gasket

5. Fill Hose Aeroquip FC619-12-00220

7. 1" Hose Clamp

10. 48001-0732 Dipstick Oil Tube

2. CM48001-0718M Flange Fill Cap

4. CM48001-0729M Flange

6. 1" Hose Barb Fitting 1-11.5NPT Male

8. CM48001-0730 Dipstick
