

# CUBEX LTD. PRODUCT UPDATE

BULLETIN: PU-0017

DATE: JANUARY 10, 1994

SUBJECT: HEAT EXCHANGER CP70015

**INFORMATION:** This new Heat Exchanger (CP70015) will increase the life of components downstream by reducing the compressor discharge air temperature. Affected components include top drive seals, the hammer and the drill string, which will all benefit by lasting longer. Installation diagrams for this update follow:
